

§ 29.22

foreign state, or which is temporarily exported for convenience or increased efficiency of transportation across parts of an adjacent foreign state and reenters the United States, shall be subject to all of the limitation and licensing requirements of the Export Administration Act of 1969.

(l) *State standards.* The Regional Director shall take into consideration, and to the extent practical comply with, applicable State standards for right-of-way construction, operation, and maintenance.

(m) *Congressional notification.* The Secretary shall promptly notify the Committee on Natural Resources of the United States House of Representatives and the Committee on Energy and Natural Resources of the United States Senate upon receipt of an application for a right-of-way for pipeline 24 inches or more in diameter, and no right-of-way for such a pipeline shall be granted until 60 days (not including days on which the House or Senate has adjourned for more than three days) after a notice of intention to grant the right-of-way, together with the Secretary's detailed findings as to the terms and conditions he proposes to impose, has been submitted to such committees.

[42 FR 43921, Aug. 31, 1977, as amended at 77 FR 5716, Feb. 6, 2012]

§ 29.22 Hearing and appeals procedures.

An appeal may be taken from any final disposition of the Regional Director to the Director, U.S. Fish and Wildlife Service, and, except in the case of a denial of a right-of-way application, from the latter's decision to the Secretary of the Interior. Appeals to the Secretary shall be taken pursuant to 43 CFR part 4, subpart G.

[44 FR 42976, July 23, 1979]

Subpart C—Mineral Operations

§ 29.31 Mineral ownerships in the United States.

Where mineral rights to lands in wildlife refuge areas are vested in the United States, the provisions of 43 CFR

50 CFR Ch. I (10–1–14 Edition)

3101.3–3, 3109.4, 3201.1–6 and 3501.2–2 govern.

[31 FR 16026, Dec. 15, 1966, as amended at 44 FR 42976, July 23, 1979]

§ 29.32 Mineral rights reserved and excepted.

Persons holding mineral rights in wildlife refuge lands by reservation in the conveyance to the United States and persons holding mineral rights in such lands which rights vested prior to the acquisition of the lands by the United States shall, to the greatest extent practicable, conduct all exploration, development, and production operations in such a manner as to prevent damage, erosion, pollution, or contamination to the lands, waters, facilities and vegetation of the area. So far as is practicable, such operations must also be conducted without interference with the operation of the refuge or disturbance to the wildlife thereon. Physical occupancy of the area must be kept to the minimum space compatible with the conduct of efficient mineral operations. Persons conducting mineral operations on refuge areas must comply with all applicable Federal and State laws and regulations for the protection of wildlife and the administration of the area. Oil field brine, slag, and all other waste and contaminating substances must be kept in the smallest practicable area, must be confined so as to prevent escape as a result of rains and high water or otherwise, and must be removed from the area as quickly as practicable in such a manner as to prevent contamination, pollution, damage, or injury to the lands, waters, facilities, or vegetation of the refuge or to wildlife. Structures and equipment must be removed from the area when the need for them has ended. Upon the cessation of operations the area shall be restored as nearly as possible to its condition prior to the commencement of operations. Nothing in this section shall be applied so as to contravene or nullify rights vested in holders of mineral interests on refuge lands.
